PROJECTS

Multi-vendor Ecommerce web application with MERN stack

University project • April 2023 – May 2023

- I am still in the process of making it.
- It will use React for the front end.
- Will have GraphQL with a Node.js and Express.js server.
- will use MongoDB and the Mongoose ODM for the database.
- Will use queries and mutations for retrieving, adding, updating, and deleting data.
- Will have a polished UI, will be interactive and responsive.
- authentication (JWT) will be included

TalentBridge app

University project • February 2023 – March 2023

- It was a website for job seeking candidates. It is live at <https://talent-bridge-app.herokuapp.com/>
- My responsibilities in this project was to create Backend of the website.
- Creating Routes for RESTful APIs.
- Helped in creating responsive frontend.
